MARINE CERTIFIED

polk | **DRB+**

Everything you love about Polk's Dynamic Balance technology—the advanced analysis of a speaker's entire electroacoustic and mechanical system and selection of better speaker materials that gives you our rich, clean, full-range sound—is built into this marine-tough, yet ruggedly sophisticated new series. It offers a range of eight sizes in total, six different coaxials from the 4" to the 6" x 9" and also includes two component systems. And with its universal fit, it can be installed in any vehicle: Automobiles, motorcycles, boats, ATVs—you name it.

HIGH PERFORMANCE FACTORY UPGRADE

With its exceptional power handling, each speaker includes a three-quarter inch terylene tweeter for optimized mids and highs that blend perfectly with the gut-thumping lows from our polypropylene woofers. The tweeters have been re-engineered for zero protrusion, and the entire speaker has a reduced mounting depth for a precise, drop-in fit. We've also ensured the mounting holes correctly align with all vehicles for the easiest installation on the market today. Love your Polk speakers but still want your factory grille? Every DB Plus speaker includes a set of 3M adhesive stickers you can put just about anywhere in your vehicle to show off your Polk pride.

MARINE CERTIFIED

The DB Plus Speaker Series are Marine Certified to push the limits of durability, so you can take them anywhere. The speakers feature an IP56 waterproof rating and are tested for salt-fog, UV and humidity.

Integrated waterproof inner and outer surrounds completely block dirt, liquid and grime from entering the speaker housing, which helps minimize corrosion and maximize longevity of the entire speaker and its housing basket. And to keep the elements out and the music pumping, each speaker also includes non-corrosive plastic grilles and stainless steel mounting hardware.

EXPECT GREAT SOUND

Having built our reputation as “The Speaker Specialists” for more than 40 years, we take pride in our superior sound and build quality, which features many patented and award-winning audio innovations, like Dynamic Balance and VoiceAdjust technologies. For the people of Polk, building audio products is not just a job—it’s a passion. And if you’re going to remember one thing, remember this: We live by the truest principle of what audio should deliver—great sound at an affordable price for everyone!
